Export Template Wizard

Choose Template Type

This wizard will allow you to export a project or project item from the current solution to a template which future projects can then be based upon.  
Which type of template would you like to create?

☒ Project template  
A project template will allow a user to create a new project based on your exported project. A user will be able to utilize your template from the New Project dialog box for client projects and from the New Website dialog box for websites.

☐ Item template  
An item template will allow a user to add your item to one of their existing projects. Your template will be available to the user from the Add New Item dialog box.

From which project would you like to create a template?
